

VITRIGO DW42RFX Refrigerator-Freezer 42 Lt.

Reference: DW42RFX

The series of stainless steel refrigerators and freezers has been renewed both in design, with the new squared door in satin-finish stainless steel and the insertion of a top with polished finish elements, and in functionality: with a single fixing profile it is possible to position the refrigerator both in the door outside version and in the door inside version by simply moving the profile itself, which, moreover, is equipped with a retractable slot that optimizes the perimeter ventilation.

In the upper top there is also an element that allows you to adopt the "Vent Position", i.e. the possibility of leaving the door ajar when not in use, thus avoiding the formation of mold and unpleasant odors. The models whose code ends with the letters "AX" are equipped with a cold storage evaporator, which allows its use even when the engines are off.
