

PRAMAC LOAD TRANSFER SWITCH LTS 70A SINGLE-PHASE

Reference: PY000A000AU

Load transfer switch LTS 70A Single-phase (for models GA13000).

The Load Transfer Switch (LTS) panel operates the power supply changeover between the generator and the Mains in backup applications, guarantying the feeding to the load within a short period of time.

It consists of a standalone cabinet which can be installed separate from the generating set. The logic control of the power supply changeover is operated by means of the Automatic Control panel mounted on the generating set, so therefore none logic device is required on the LTS panel.
