

DOMETIC DC KIT DSP-T 24

Reference: 9600007287

DC EXTENSION KIT FOR FRESHLIGHT/FRESHJET/FRESHWELL, 1800 W, 24 V

This clever kit enables the air conditioner to run off the 24 V vehicle battery even while driving. The kit includes a charging current distributor with low-voltage protection, which ensures optimal energy efficiency and saves precious battery power.

Run your air conditioner even while driving

Do you want to run your Dometic air conditioner while driving to your holiday destination? You can with this optional DC kit! The Dometic DC Kit makes sure all passengers, including the four-legged ones, can travel in complete comfort. The DC kit includes a charging current distributor with low-voltage protection, which ensures optimal energy efficiency. It regulates the power distribution between the batteries and the generator to prevent overloading of batteries or onboard electronics.
