

N. 3 PTC thermistors MJB560

Reference: MA111-560

N. 3 PTC thermistors MJB560

The N. 3 PTC (Positive Temperature Coefficient) thermistors are designed specifically for use with the MJB560. These thermistors play a crucial role in temperature sensing and control, ensuring safe and efficient operation of your MJB560 equipment. With their reliable performance and compatibility, they are an essential component for various applications where precise temperature management is essential. Rely on the N. 3 PTC thermistors to maintain optimal conditions for your MJB560.

THIS ITEM CAN BE PURCHASED ONLY AND EXCLUSIVELY IN COMBINATION WITH THE MARELLI GENERATORI MJB
