

HONDA Outboard BF 5DH SHU

Reference: BF 5DH SHU

HONDA BF5DH SHU OUTBOARD MOTOR

The Honda BF5DH SHU is an outboard motor powerful enough to take you into coastal waters on an inflatable boat or dinghy. Lightweight to carry, they include ergonomic handles and can be easily stored in the trunk of your car.

The smallest of the Honda outboards is very easy to use. Unlike 2-stroke engines, it's quiet and you don't have to worry about the mixture of oil and gasoline. So you can accelerate to the middle of a lake, up a river or cruise along the coastal strip of the sea.

The Honda BF5DH SHU has single-cylinder 4-stroke engines with a top valve. They are easy to start with a manual system that allows the outboard to spin freely right away. The Honda BF5DH outboards have the most advanced technology that precisely controls the ignition phase, so when you start it, even in cold weather, it will start without hesitation. The air-cooled BF5DH , provides great maneuverability with 360° rotation and a built-in fuel saving space tank.

It is very important for a small boat to be agile and able to change direction quickly. The small Honda BF5DH has a quick turning action, which is perfect for reversing without changing gears. Simply turn the rudder 180° and the boat is able to move in reverse.

Once securely mounted to the boat, you'll find that these outboards are very lightweight and easy to pull out of the water by tilting them. This way you avoid damaging your motor propellers when moving through shallow water or on shore. You can quickly get moving again by acting on the spring system that allows you to lock the motor for safety.

These Honda BF5DH outboards are the lightest in their class, so it's no wonder they're easy to pull out. They've been made easier to carry, with an ergonomic handle positioned at just the right balance point, allowing you to walk normally without effort.

The sleek design has been taken care of throughout, right down to the slim gearbox that reduces drag in the water while promoting fuel economy.

The knob gives a remarkably smooth feel and is equipped with a screw-clutch that allows it to be locked at various speeds, thus relaxing your hand.

Improving the quality of our lives means, above all, taking care of the environment in which we live. We cannot allow boat fuel to pollute the marine environment. That's why Honda has made outboard engines cleaner, quieter and more environmentally friendly with the introduction of the 4-stroke.

TECHNICAL SPECIFICATIONS OUTBOARD HONDA BF5DH SHU:

Net Power (kW): 3.7

Net Power (Hp): 5

Displacement: 127 cm³

Shank length: Short

Dry weight (Kg): 27.5

Starting: Manual recoil starter

Ignition system: Digital CDI
 Setup and engine lifting: Manual 5 positions
 Transom height (mm): 561
 Length (mm): 524
 Width (mm): 347
 Height (mm): 1147
 Bore x stroke: 60 x 45 mm
 Engine Brand: Honda
 Engine Type: OHV, 4 stroke
 Number of cylinders: 1
 Speed at full throttle (rpm): 4500-5500
 Cooling system: Water
 Battery charge capacity (A): 6

Are you looking for an outboard with different technical characteristics? [HERE](#) you can find the whole range Honda or other brands specializing in the field.

Technical Sheet

Fuel	Gasoline
Engine	OHV, 4 stroke
Ignition	Digital CDI with variable ignition advance
Starting system	Manuale
Engine capacity (cm ³)	127
Number cylinders	1
Cooling	Water (with thermostat)
Bore x stroke (mm)	60 x 45
Reduction ratio	2.08
Rpm at full throttle (rpm)	4,500?5,500
Appearance and engine lifting	Manual / Manual 5 position
Transom height (mm)	561
Net power (kW)	3.7
Mechanical power (hp)	5
Fuel tank capacity (L)	1.5
Length (mm)	524
Width (mm)	347
Height (mm)	1147
Dry weight (Kg)	27.5
Shaft Length	S
