

## IRONSYSYSTEM MCT - 125/6 CRANE SHELF/COLUMN

Reference: MCT - 125/6

### IRONSYSYSTEM MCT - 125/6 BRIDGE/COLUMN crane

IRONSYSYSTEM MCT - 125/6 is a shelf/column crane made up of a 270° manually rotating jib in drawn channel with a maximum capacity of 125Kg.

IRONSYSYSTEM MCT - 125/6 consists of a boom in HEA or HEB truss pulled manually rotating 180° equipped with ball bearings for rotation that allow a rotation without tearing. The brackets are made of bent sheet metal to be anchored to the existing column by means of counter-brackets and tie-rods.

In addition, the IRONSYSYSTEM MCT - 125/6 is equipped with adjustable disk brake with ferode, flat hoist power cable, "mushrooms" cable holder in plastic material, on-off switch on the column.

IRONSYSYSTEM MCT - 125/6 respects the standard of painting is of the type to powder RAL1004, but they can also be supplied manufactured hot galvanized or treated with specific cycles of painting for external or marine environment, even highly aggressive.

The IRONSYSYSTEM crane is built to comply with the strictest safety standards for both small and medium-sized companies and for the industrial sector, guaranteeing reliability and safety in the intended environment.

#### TECHNICAL FEATURES IRONSYSYSTEM MCT - 125/6

Load capacity: 125 Kg  
Arm: 6 m  
Total height: 3,5 m  
Underarm height: 2,950 m

#### COMPONENTS

- Optagonal column in bent sheet metal
- Tensioned channel arm rotating on ball bearings
- Adjustable disc brake with ferode.
- Flat wire for hoist feeding.
- Cable holder mushrooms in plastic material.
- On-Off switch.
- Powder paint finish.
