AURORA LIGHTING TOWER ZETA L4X160

AURORA ZETA L4X160 is a lighting tower with hydraulic lifting equipped with 4 floodlights capable of delivering a light output of 160W each.

AURORA ZETA L4X160 is equipped with a galvanized steel lifting tower able to extend up to a maximum height of 7 meters, including 4 stabilization feet to secure the light tower once opened.

AURORA ZETA L4X160 has an input plug and an output socket 16A 230V for the with which it can be combined with other units. AURORA ZETA L4X160 is designed to be combined with a generator set and can be connected in series in order to use one generator for several lighting units.

The lenses of the AURORA light tower feature an extremely special optic designed specifically for the civil engineering and construction sectors. This innovative design of the fully directional LED lenses ensures maximization of light diffusion and reduction of waste.

AURORA ZETA L4X160 is characterized by extremely compact dimensions and square shape that optimize and facilitate its positioning and transport on mobile vehicles.

The base, with 4 adjustable and removable anti-tip stabilizers, guarantees a wind stability of 100 Km/h.
