MASE MARINER 2460 K SINGLE-PHASE MARINE GENERATOR 24KW EPA

MASE MARINER2460K single phase marine generator is equipped with a KUBOTA V2403 engine that complies with EPA regulations, powered by diesel capable of delivering a maximum power of 24 KW at 1800 rpm.

The MASE MARINER2460K is built with and synchronous alternator, self-excited with air cooling, is extremely compact and powerful, suitable even on small boats.

The MASE MARINER2460K alternator is a 4-pole synchronous, self-regulated, self-excited, brushless alternator, which in combination with the powerful KUBOTA engine can deliver a maximum power of 24KW. An AVR voltage regulator is indispensable to make the latest generation of synchronous generators work at their best. We are talking about alternating current electric motors, whose rotation speed is synchronized with the electric frequency. The voltage regulator, applied to synchronous current generators, has as its objective the maintenance of a constant operation of the machine, in its regime of greater efficiency.

The cooling of the engine of the MASE MARINER2460K takes place by circulating coolant in a closed circuit. The system is composed of a cupronickel exchanger, inside of which the heat exchange between coolant and sea water takes place. Two separate pumps provide for the circulation of the coolant and seawater in the generator MASE MARINER2460K.

The MASE MARINER2460K Marine Generator has **EPA Certification** valid only **for the US market**.
