

LARIUS - Super Fast Airless nozzle SFC11-40

Reference: Ugello Airless Super Fast SFC11-40

LARIUS - Super Fast Airless nozzle SFC11-40

The Airless paint spray nozzles are suitable for use with the Air Mixing Spray Mist Clean Base.
The working pressure on the high pressure spray gun and the abrasive materials will eventually wear out the paint spray nozzle, reducing the spray pattern width and requiring more passes to finish the job with more time and paint wasted.
Immediate replacement of the worn high pressure paint nozzle is recommended as it may exceed the maximum flow rate of your professional airless sprayer.

Compatible with all Airless guns.
