

PRAMAC NETWORK/GENERATOR SWITCHBOARD LTS 1000A

Reference: SY000A0011H

PRAMAC NETWORK/GENERATOR SWITCHBOARD LTS 1000A

Load Transfer Switch (Accessory for industrial generators): transfer switch panel supplied separately in a dedicated metal enclosure (ready for wall or floor mounting/installation). The LTS panel includes two electrically and mechanically interlocked contactors (for transferring power from the mains or from the generator), an emergency stop push button, power terminal blocks (mains, generator and load), and auxiliary terminal blocks for simple connection to the ACP panel (mounted on the generator).
Note: This accessory is compatible exclusively with the ACP panel.
