

RemigoOne Magnetic Key / Killswitch

Reference: RemigoOne Killswitch

RemigoOne Magnetic Key / Killswitch

Magnetic killswitch for RemigoOne electric outboard motor serves as a turn on/off key and a magnetic killswitch. You simply attach the safety cord around your driving hand's wrist for safety and steer using the two buttons on the interface. Then attach the magnetic killswitch to the lower end of the interface. Wait until left indicator start showing state of charge and off you go

Looking for an electric outboard? [HERE](#) you can find the entire Remigo range or other brands specializing in the field.
