

Generator HYBRID EcoPower EPH459643

Reference: EPH45/96/43

Generator HYBRID EcoPower EPH459643 energy storage system in Battery

Generator HYBRID EcoPower EPH459643 energy storage system saves you money and reduces pollution

ZERO emissions, ZERO noise, ZERO liquids

ECO powered by CGM Thanks to its innovative technology, HYBRID EcoPower Generator EPH459643 guarantees zero emissions, zero noise and zero liquids, offering you a sustainable and environmentally friendly solution.

Advantages of the HYBRID EcoPower EPH459643 Generator

Energy saving: HYBRID EcoPower Generator allows you to reduce your energy consumption, thanks to its ability to store energy produced from renewable sources or the electricity grid.

Reduction of emissions: HYBRID EcoPower Generator EPH459643 battery helps reduce air pollution, thanks to its zero emissions.

Flexibility: HYBRID EcoPower Generator HYBRID EPH459643 can be used in a variety of applications, from residential to industrial.

Applications of EcoPower HYBRID Generator EPH459643

EcoPower HYBRID Generator EPH459643 is ideal for a wide range of applications, including:

Emergency power supply: EcoPower HYBRID EPH459643 Generator can provide power in the event of a blackout, ensuring continuity

of service.

Reactive energy compensation: EcoPower HYBRID generator EPH459643 can help improve the stability of the electricity grid by compensating the reactive energy produced by inductive loads.

Energy exchange with the grid: EcoPower HYBRID EPH459643 EcoPower HYBRID Generator can be used to exchange energy with the electricity grid, resulting in an economic gain.

HYBRID EcoPower generator EPH459643 powered by CGM: the sustainable solution for your future.

HYBRID EcoPower generator EPH459643 is the ideal solution for those who want to save money, reduce pollution and use energy

in a sustainable way.

Technical data HYBRID EcoPower EPH459643 generator:

Rated power: 45 KVA
Storage capacity: 96 KWh
Generator capacity: 43 KVA PRP
Generator model: YANMAR 4TNV88CT
Frequency: 50 Hz
Voltage: 400 volts
Weight: 2700 kg
Dimensions: TDB
Battery type: LINMC
Quantity: 4
Cycles @ 90%=6000
Recharge Time: 20-90%=2.15Hr/20-100%=2.40Hr

The innovative technology of the HYBRID EcoPower EPH459643 Generator makes it a sustainable and environmentally friendly solution that helps reduce air pollution.

Generator HYBRID EcoPower EPH459643 is a solution that saves you money and reduces your company's environmental impact, contributing to a more sustainable future.

The batteries of the HYBRID EcoPower EPH459643 Generator are made of lithium-nickel-manganese-cobalt (NMC), a state-of-the-art technology that guarantees a long service life.

The generator is powered by a Yanmar 4TNV88 diesel engine, a reliable and powerful engine that guarantees high performance.

The EcoPower EPH454843 Generator is a reliable solution that guarantees uninterrupted power supply, even in the event of a blackout.

The HYBRID EcoPower EPH454843 Generator is a sustainable solution that helps reduce air pollution, improving the quality of the air we breathe.

Technical Sheet

Phase	Three phase
Continuous power three phase (KW)	96
Continuous power three phase (KVA)	45
Fuel	Batteria
Frequency (Hz)	50
Battery type	LINMC
Super silenced	Yes

Weight (Kg)	2700
Recharge times	20-90%-2.15Hr/20-100%-2.40Hr
Voltaggio	400volt
modalità UPS	Yes
Generator capacity	43 KVA PRP
