

I-VIEW HELMET BRACKET

Reference: 03.5797

I-VEW BRACKET FOR ELASTIC HELMET

On most construction sites it is mandatory to wear a helmet while working. In order to take advantage of the superior I-VIEW headlamp while wearing a helmet, we have designed a bracket to mount I-VIEW directly to the front of the helmet.

Together with the bracket you will receive 3 adhesive mounting bases. The base has a very strong adhesive glue under the tear-off tape and is fixed to the helmet. The I-VIEW headlamp is fixed directly onto the bracket without additional fasteners and can be easily removed from the bracket if required for other purposes.

The bracket is flexible and allows the illumination angle of 150° to be adjusted to the optimum illumination angle.

Technical characteristics:

Net weight (kg):0.02
Length (mm):104.00
Width (mm):34.00
Height (mm):28.00
