

GYS BATTERY CHARGER GYSFLASH INVERTER 12V

Reference: 026056

GYS BATTERY CHARGER GYSFLASH INVERTER 12V

The GYS BATTERY CHARGER GYSFLASH INVERTER 12V is a state-of-the-art device, designed to meet all charging and maintenance needs of 12V lead-acid batteries. Thanks to its inverter technology and 5 built-in functions, this charger stands out for its versatility, ease of use and high performance.

5 key functions for a top-performing battery:

Charging: Fast and safe battery charging, thanks to an advanced charging curve that adapts voltage and current according to the state of the battery.

Diagnosis: Assesses the health of the battery and identifies any problems, such as sulphation or defective cells.

Showroom: Keeps a vehicle's battery on show at its maximum charge level at all times, guaranteeing an immediate start.

Battery change: Compensates for absorption peaks during battery change, preserving the memories of the vehicle's electronic devices.

Stabilised power supply: Provides stable voltage and current, ideal for powering electronic devices during maintenance or repair.

Distinctive features:

Intuitive and multilingual: The interface is easy to use and the display is available in 19 languages.

Compact and versatile: Its small size and low height allow it to be easily positioned under the vehicle.

Safe and reliable: Multiple protections and cooling system ensure safe use and prolong product life.

Advanced functions: Automatic restart, cable calibration, showroom mode, customisable charging curve and automatic recovery of sulphated batteries.

Flexible: Can be used with batteries from 10 to 600 Ah and adapts to different cable types.

Technical specifications GYS GYSFLASH INVERTER 12V BATTERY CHARGER:

Model: GYSFLASH 50.12 HF FV
Power supply: 85 > 265 V, 50/60 Hz
Power consumption: 850

Maximum charging current: 50 A
Battery voltage: 12 V
Battery capacity: 10-600 Ah
Degree of protection: IP21
Dimensions: 30 x 29.2 x 10.5 cm
Weight: 6.5 kg
Charging curve: IU0 I0 U
BSU:
Charging voltage: 13.5V - 14.8V
Trickle voltage: 12.9 V
Holding current: 80 A
