

Mosa GT10 PTO Generator 1500rpm 10kVA AVR

Reference: SGT10

Mosa PTO Generator 1500rpm 10kVA AVR

Mosa PTO Generator 1500rpm 10kVA AVR is a current generator designed to be powered by the power take-off of a tractor, ideal for use in agricultural contexts or in places where an electrical grid is not available. This generator offers a power of 10 kVA (kilovolt-amperes) in apparent power and 8 kW (kilowatts) in active power, making it suitable for powering a wide range of electrical equipment.

The heart of the **Mosa PTO Generator 1500rpm 10kVA AVR** is the AVR (Automatic Voltage Regulator) voltage regulator, which ensures a stable and constant voltage, protecting connected equipment from voltage fluctuations. The generator is designed to operate at 1500 revolutions per minute, a common speed for tractor PTOs.

Mosa PTO Generator 1500rpm 10kVA AVR is a reliable and robust solution for those who need electricity in remote locations or in emergency situations. Its ease of connection to the tractor and the stability of the delivered voltage make it an excellent choice for farmers, ranchers and anyone who needs a mobile and powerful energy source.

Technical Features **Mosa PTO Generator 1500rpm**:

Electrical Power PRP [kVA]: 10
Electrical Power PRP [kW]: 8
General switch size A: 16
Voltage regulator: AVR
Engine speed (rpm): 430
Tractor HP: 32
Weight (Kg): 175
Height (mm): 1027
Length (mm): 1148
Width (mm): 960
