

TESSARI EVO15 Natural Gas / LPG Cogenerator 15 kW Electrical Output 19.7 kW Thermal Output

Reference: EVO15

Cogeneration plants are machines capable of producing heat and electricity at the same time.

Thessari EVO15 Series generating sets with micro-cogeneration units.

Power generators using non-polluting fuels such as LPG and NATURAL GAS.

These generating sets are able to produce electrical and thermal energy at low cost with lower operating costs and greater energy efficiency and energy supply.
